ADA Finance - DeFi Architect - REMOTE JOB!

ADA Finance has big ambitions for becoming the first DeFi Ecosystem on Avalanche and Cardano Blockchains with multi-network support. We are seeking an efficient DeFi Architect, who has experience with launching products that scale exponentially. We value quick decision making based on data, and strong people leadership skills. Our ideal candidate would be passionate about ADA Finance, DeFi, and has worked on DeFi products or applications in the past.

In this role, you will

Be responsible for developing and managing the smart contract architecture for ADA DeFi Ecosystem that includes swap with AMM, staking and farming solutions, trading operations with lending and margin trading contracts. As the DeFi architect, you will guide the Senior development team implementing the Smart Contracts on Cardano and Avalanche Blockchains in Haskell and Solidity programming languages.

About You:

- Successfully launched Blockchain-based, DeFi or FinTech products in the past.
- Have knowledge of the intricate workings of Swap / AMM protocol / Staking / Farming / Lending DeFi products
- Possess strong technical writing skills describing tech specs, use cases and acceptance criteria for Smart Contract (SC) deployments
- Have an in depth knowledge of our composable SC architecture and manage its components
- Configure, test, document, support and provide suggestions to optimize Testnet and Mainnet deployments
- Manage the implementation of measures that increase the efficiency of the delivery, reducing TTM (time to market) for new products/features
- Support colleagues and community by answering technical questions both internally and externally

Duties and Responsibilities:

Develop and communicate a detailed architecture for the Solidity developers suggesting the most efficient ways to perform transactions with minimum cost and best performance. Collaborate with the C-Level team on forming the requirements, gathering the needs from the community and translating those requirements into functional specs for the dev team. Argument the best and most efficient DeFi solutions to the community, sharing the progress milestones and collaborating on technical articles with the marketing team.

About ADA Finance

Innovation to the DeFi industry is tradition when the first DeFi ecosystem gets introduced on a blockchain. ADA Finance honors that tradition for the Cardano - and Avalanche blockchain.

Our vision is to bring a multi network supportive DeFi ecosystem. Cardano is not going to be ready for DeFi activity, but we keep developing on Cardano, in parallel with Avalanche.
