

ADA Finance - Senior Software Engineer - REMOTE JOB

ADA Finance has big ambitions for becoming the first DeFi Ecosystem. We are seeking an experienced software engineer who would be eager to join the team of senior developers and solution architects. Our ideal candidate would be passionate about ADA Finance and DeFi, and would know how to help us get the word out about our service.

In this role, you will

Be responsible for developing the ADA Finance DeFi ecosystem. This includes developing financial transactions with AMM, trading operations with lending and margin trading contracts. As a Senior Software Engineer (Solidity), you will join the senior development team implementing the smart contract functionality on Solidity programming language.

About You:

- Develop solutions that are scalable, robust and fault tolerant
- At least 3 year of experience in Solidity mainnet deployments.
- Proficient in Ethereum tools such as Truffle, Web3, Hardhat or similar.
- Have experience participating in Open Source projects
- Have a hands-on knowledge of Test-Driven-Development that includes unit and integration testing.
- Possess strong technical writing skills describing the inner workings and product guides
- Support colleagues by answering technical questions both internally and externally

Duties and Responsibilities:

- Develop efficient solutions that minimise the operations and transactions for users with an optimised Solidity smart contracts execution.
- Develop functional code that is tested and well documented.
- Participate in the team's meetings following the Scrum methodology: Product Backlog Grooming, Sprint Planning / Review / Retrospective, Daily Standups.

About ADA Finance

Innovation to the DeFi industry is tradition when the first DeFi ecosystem gets introduced on Cardano and Avalanche Blockchains. ADA Finance offers a fair, transparent and secure environment where every transaction runs in a decentralized way by utilizing smart contracts at a high-frequency.

Our vision is to be the first DeFi Ecosystem with multi-network support for Cardano and Avalanche Blockchain, offering the DeFi features and introducing innovative passive income opportunities to the ADA Finance community.
